

List of Tables

| | |
|---|----|
| Table 2.1: Population of Darrang district | 38 |
| Table 2.2: Literacy of Darrang district..... | 38 |
| Table 2.3: Soil sampling stations..... | 41 |
| Table 2.4: Water sampling locations inside the tea gardens | 43 |
| Table 2.5: Water sampling locations outside the tea gardens..... | 44 |
| Table 4.1: Soil texture inside the tea gardens..... | 74 |
| Table 4.2: Soil texture outside tea gardens..... | 74 |
| Table 4.3: Electrical Conductance of the soil samples inside the tea gardens | 75 |
| Table 4.4: Electrical Conductance of the soil samples outside the tea gardens | 76 |
| Table 4.5: Statistical analysis for Electrical Conductance of soil..... | 77 |
| Table 4.6: Values for pH of the soil samples inside the tea gardens | 78 |
| Table 4.7: Values for pH of the soil samples outside the tea gardens | 79 |
| Table 4.8: Statistical analysis for pH of soil | 80 |
| Table 4.9: Values for % Organic carbon of the soil samples inside the tea gardens. | 82 |
| Table 4.10: Values for % Organic carbon of the soil samples outside the tea gardens | 82 |
| Table 4.11: Statistical analysis for % Organic carbon of soil | 83 |
| Table 4.12: Statistical analysis for % organic matter in soil | 86 |

| | |
|--|-----|
| Table 4.11: Statistical analysis for % Organic carbon of soil | 83 |
| Table 4.12: Statistical analysis for % organic matter in soil | 86 |
| Table 4.13: Values for Total Nitrogen of the soil samples inside tea gardens | 87 |
| Table 4.14: Values for Total Nitrogen of the soil samples outside the tea gardens.. | 88 |
| Table 4.15: Statistical analysis for total Nitrogen in soil..... | 89 |
| Table 4.16: Values for Phosphorous of the soil samples inside the tea gardens..... | 91 |
| Table 4.17: Values for Phosphorous of the soil samples outside the tea gardens..... | 91 |
| Table 4.18: Statistical analysis for Phosphorous in soil..... | 92 |
| Table 4.19: Values for Potassium of the soil samples inside the tea gardens..... | 94 |
| Table 4.20: Values for Potassium of the soil samples outside the tea gardens..... | 95 |
| Table 4.21: Statistical analysis for Potassium in soil | 96 |
| Table 4.22: Values for Bulk density of the soil samples inside the tea gardens..... | 98 |
| Table 4.23: Values for bulk density of the Soil samples outside the tea gardens..... | 98 |
| Table 4.24: Statistical analysis for bulk density of soil | 99 |
| Table 4.25: Values for Zinc of the soil samples inside the tea gardens..... | 102 |
| Table 4.26: Values for Zinc of the soil samples outside the tea gardens | 102 |
| Table 4.27: Statistical analysis for Zinc in soil..... | 103 |
| Table 4.28: Copper values of the soil samples inside tea gardens..... | 105 |
| Table 4.29: Values for Copper of the soil samples outside tea gardens..... | 106 |
| Table 4.30: Statistical analysis for Copper in soil | 107 |
| Table 4.31: Values for manganese of the soil samples inside the tea gardens..... | 109 |

| | |
|--|-----|
| Table 4.32 Values for Manganese of the soil samples outside tea gardens..... | 109 |
| Table 4.33: Statistical analysis for Manganese in soil | 110 |
| Table 4.34: Values for Iron in the soil samples inside the tea gardens..... | 112 |
| Table 4.35: Values for Iron in the soil samples outside the tea gardens | 112 |
| Table 4.36: Statistical analysis for Iron in soil..... | 113 |
| Table 4.37 : Values for Lead in the soil samples inside tea gardens..... | 116 |
| Table 4.38: Values for Lead in the soil samples outside tea gardens | 116 |
| Table 4.39: Statistical analysis for Lead in soil..... | 117 |
| Table 4.40: Values for Calcium in the soil samples inside tea gardens..... | 119 |
| Table 4.41: Values for Calcium in the soil samples outside tea gardens | 120 |
| Table 4.42: Statistical analysis for Calcium in soil | 121 |
| Table 4.43: Values for Magnesium of the soil samples inside the tea gardens..... | 122 |
| Table 4.44: Values for Magnesium of the soil samples outside the tea gardens | 122 |
| Table 4.45: Statistical analysis for Magnesium in soil | 123 |
| Table 4.46: Values for Chloride of the soil samples inside the tea gardens..... | 126 |
| Table 4.47 : Values for Chloride of the soil samples outside the tea gardens | 126 |
| Table 4.48: Statistical analysis for Chloride in soil..... | 127 |
| Table 4.49: Values for Sulphate –S of the soil samples inside the tea gardens..... | 128 |
| Table 4.50: Values for Sulphate –S of soil samples outside the tea gardens..... | 129 |
| Table 4.51: Statistical analysis for Sulphate –S in soil | 130 |
| Table 4.52: Values for temperature of the water samples in the study area | 132 |

| | |
|--|-----|
| Table 4.53: Colour of the water samples in the study area | 133 |
| Table 4.54: Odour and Taste of the water samples in the study area | 135 |
| Table 4.55: Values for solids of the water samples in post-monsoon in the study area | 137 |
| Table 4.56: Values for solids of the water samples in pre-monsoon in the study area | 138 |
| Table 4.57: Values for turbidity of the water samples in the study area | 139 |
| Table 4.58: Statistical analysis for turbidity of water | 140 |
| Table 4.59: Values for electrical conductance of the water samples in the study area | 143 |
| Table 4.60: Statistical analysis for electrical conductance of water | 144 |
| Table 4.61: Values for pH of the water samples in the study area..... | 147 |
| Table 4.62: Statistical analysis for pH of water | 148 |
| Table 4.63: Values for dissolved oxygen of the water samples in the study area..... | 152 |
| Table 4.64: Statistical analysis for dissolved oxygen of water | 153 |
| Table 4.65: Values for alkalinity of the water samples in the study area..... | 155 |
| Table 4.66: Statistical analysis for alkalinity of water | 156 |
| Table 4.67: Values for hardness of the water samples in the study area..... | 159 |
| Table 4.68: Statistical analysis for hardness of water | 160 |
| Table 4.69: Values for calcium of the water samples in the study area..... | 164 |
| Table 4.70: Statistical analysis for calcium in water | 165 |
| Table 4.71: Values for magnesium of the water samples in the study area | 166 |
| Table 4.72: Statistical analysis for magnesium in water | 167 |

| | |
|---|-----|
| Table 4.73: Values for chloride of the water samples in the study area..... | 170 |
| Table 4.74: Statistical analysis for chloride in water | 171 |
| Table 4.75: Values for sulphate of the water samples in the study area | 174 |
| Table 4.76: Statistical analysis for sulphate in water | 175 |
| Table 4.77: Values for nitrate of the water samples in the study area | 178 |
| Table 4.78: Statistical analysis for nitrate of water | 179 |
| Table 4.79: Values for phosphate of water samples in the study area..... | 182 |
| Table 4.80: <i>Statistical</i> analysis for phosphate in water | 183 |
| Table 4.81: Values for fluoride of the water samples in the study area | 186 |
| Table 4.82: Statistical analysis for fluoride in water | 187 |
| Table 4.83: Values for Fe of the water samples in the study area..... | 190 |
| Table 4.84: Statistical analysis for iron in water | 191 |
| Table 4.85: Values for lead of the water samples in the study area..... | 195 |
| Table 4.86: Statistical analysis for lead in water | 196 |
| Table 4.87: Values for arsenic of water samples in the study area | 199 |
| Table 4.88: Statistical analysis for arsenic in water | 200 |
| Table 4.89: Values for cadmium of the water samples in the study area..... | 203 |
| Table 4.90: Statistical analysis for cadmium in water | 204 |
| Table 4.91 : Values for copper of the water samples in the study area..... | 207 |
| Table 4.92: Statistical analysis for copper in water | 208 |
| Table 4.93: Values for manganese of the water samples in the study area | 211 |

| | |
|---|-----|
| Table 4.94: Statistical analysis for manganese in water | 212 |
| Table 4.95: Values for zinc of the water samples in the study area | 215 |
| Table 4.96: Statistical analysis for Zinc in water | 216 |
| Table 4.97: Values for sodium of the water samples in the study area | 219 |
| Table 4.98: Statistical analysis for sodium in water | 220 |
| Table 4.99: Values for potassium of the water samples in the study area | 223 |
| Table 4.100: Statistical analysis for potassium in water | 224 |
| Table 5.1: Soil quality parameters with rating..... | 230 |
| Table 5.2: Correlation table for soil parameters..... | 231 |
| Table I (a): Pearson's Correlations among soil quality parameters inside the tea gardens..... | 231 |
| Table I (b): Pearson's Correlations among soil quality parameters outside the tea gardens | 232 |
| Table 5.3: Analytical data of water inside the tea gardens with rating chart..... | 236 |
| Table 5.4: Analytical data of water outside the tea gardens with rating chart..... | 237 |
| Table 5.5: Correlation table for water quality parameters inside tea gardens..... | 238 |
| Table II (a): Pearson's two – tailed Correlation for water quality parameters inside the tea gardens in premonsoon..... | 238 |
| Table II (b): Pearson's two – tailed Correlation for water quality parameters inside the tea gardens in premonsoon..... | 239 |
| III (a): Pearson's Correlation for water quality parameters inside the tea gardens | 240 |

| | |
|---|-----|
| III(b): Pearson's two – tailed Correlation for water quality parameters inside the tea gardens in postmonsoon | 241 |
| Table 5.6: Correlation table for water quality parameters outside tea gardens..... | 242 |
| Table IV (a): Pearson's two – tailed Correlation for water quality parameters outside the tea gardens in premonsoon | 242 |
| Table IV (b): Pearson's two – tailed Correlation for water quality parameters outside the tea gardens in premonsoon | 243 |
| Table V (a): Pearson's two – tailed Correlation for water quality parameters outside the tea gardens in postmonsoon | 244 |
| Table V (b): Pearson's two – tailed Correlation for water quality parameters outside the tea gardens in postmonsoon | 245 |
