

List of Figures

<i>Figure 2.1 Satellite mosaic map of Assam</i>	33
<i>Figure 2.2 Location of Darrang district</i>	36
<i>Figure 2.3 Distribution of tea estates in Darrang district</i>	39
<i>Figure 2.4 Sketch map of Darrang district showing 30 soil sampling stations...</i>	42
<i>Figure 2.5 Sketch map of Darrang district showing 28 water sampling stations...</i>	45
<i>Figure 3.1 Soil sample collection pattern 1</i>	47
<i>Figure 3.2 Soil sample collection pattern 2</i>	48
<i>Figure 4.1 Variation of EC among soil sampling stations</i>	76
<i>Figure 4.2 Variation of pH among different soil sampling stations</i>	79
<i>Figure 4.3 Variation of % organic carbon among soil sampling stations</i>	84
<i>Figure 4.4 Variation of total nitrogen among soil sampling stations</i>	88
<i>Figure 4.5 Variation of P among soil sampling stations</i>	93
<i>Figure 4.6: Variation of potassium among soil sampling stations</i>	95
<i>Figure 4.7: Variation of bulk density among soil sampling stations</i>	100
<i>Figure 4.8: Variation of Zinc among soil sampling stations</i>	104
<i>Figure 4.9: Variation of Copper among soil sampling stations</i>	106
<i>Figure 4.10: Variation of Manganese among soil sampling stations...</i>	111
<i>Figure 4.11: Variation of iron among soil sampling stations</i>	114

<i>Figure 4.12: Variation of lead among soil sampling stations.....</i>	118
<i>Figure 4.13: Variation of calcium among soil sampling stations.....</i>	120
<i>Figure 4.14: Variation of magnesium among soil sampling stations.....</i>	124
<i>Figure 4.15: Variation of chloride among soil sampling stations.....</i>	128
<i>Figure 4.16: Variation of sulphate-sulphur among soil sampling stations.....</i>	129
<i>Figure 4.17: Seasonal variations of turbidity of water inside the tea gardens...</i>	141
<i>Figure 4.18: Seasonal variations of turbidity of water outside the tea gardens...</i>	141
<i>Figure 4.19: Seasonal variations of electrical conductance of water inside the tea gardens.....</i>	145
<i>Figure 4.20: Seasonal variations of electrical conductance of water outside the tea gardens.....</i>	145
<i>Figure 4.21: Seasonal variations of pH of water inside the tea gardens.....</i>	149
<i>Figure 4.22: Seasonal variations of pH of water outside the tea gardens.....</i>	149
<i>Figure 4.23: Seasonal variations of dissolved oxygen of water inside the tea gardens.....</i>	151
<i>Figure 4.24: Seasonal variations of dissolved oxygen of water outside the tea gardens.....</i>	154
<i>Figure 4.25: Seasonal variations of alkalinity of water inside the tea gardens...</i>	157
<i>Figure 4.26: Seasonal variations of alkalinity of water outside the tea gardens..</i>	158
<i>Figure 4.27: Seasonal variations of hardness of water inside the tea gardens...</i>	161

<i>Figure 4.28: Seasonal variations of hardness of water outside the tea gardens...</i>	161
<i>Figure 4.29: Seasonal variations of calcium of water inside the tea gardens.....</i>	163
<i>Figure 4.30 : Seasonal variations of calcium of water outside the tea gardens</i>	165
<i>Figure 4.31 : Seasonal variations of magnesium of water inside the tea gardens</i>	168
<i>Figure 4.32 : Seasonal variations of magnesium of water outside the tea gardens</i>	168
<i>Figure 4.33: Seasonal variations of chloride of water inside the tea gardens....</i>	172
<i>Figure 4.34: Seasonal variations of chloride of water outside the tea gardens....</i>	172
<i>Figure 4.35: Seasonal variations of sulphate of water inside the tea gardens...</i>	176
<i>Figure 4.36: Seasonal variations of sulphate of water outside the tea gardens....</i>	176
<i>Figure 4.37: Seasonal variations of nitrate of water inside the tea gardens.....</i>	180
<i>Figure 4.38: Seasonal variations of nitrate of water outside the tea gardens....</i>	180
<i>Figure 4.39: Seasonal variations of phosphate of water inside the tea gardens..</i>	184
<i>Figure 4.40: Seasonal variations of phosphate outside the tea gardens.....</i>	184
<i>Figure 4.41: Seasonal variations of fluoride of water inside the tea gardens....</i>	188
<i>Figure 4.42: Seasonal variations of fluoride of water outside the tea gardens....</i>	188
<i>Figure 4.43: Seasonal variations of iron of water inside the tea gardens.....</i>	192
<i>Figure 4.44: Seasonal variations of iron of water outside the tea gardens.....</i>	192
<i>Figure 4.45: Seasonal variations of lead of water inside the tea gardens.....</i>	197
<i>Figure 4.46: Seasonal variations of lead of water outside the tea gardens.....</i>	197
<i>Figure 4.47: Seasonal variations of arsenic of water inside the tea gardens...</i>	201
<i>Figure 4.48: Seasonal variations of arsenic of water outside the tea gardens....</i>	201

<i>Figure 4.49: Seasonal variations of cadmium of water inside the tea gardens....</i>	205
<i>Figure 4.50: Seasonal variations of cadmium of water outside the tea gardens...</i>	205
<i>Figure 4.51: Seasonal variations of copper of water inside the tea gardens.....</i>	209
<i>Figure 4.52: Seasonal variations of copper of water outside the tea gardens....</i>	210
<i>Figure 4.53: Seasonal variations of manganese of water inside the tea gardens..</i>	213
<i>Figure 4.54: Seasonal variations of manganese of water outside the tea gardens.</i>	213
<i>Figure 4.55: Seasonal variations of zinc of water inside the tea gardens...</i>	217
<i>Figure 4.56: Seasonal variations of zinc of water outside the tea gardens....</i>	217
<i>Figure 4.57: Seasonal variations of sodium of water inside the tea gardens...</i>	221
<i>Figure 4.58: Seasonal variations of sodium of water outside the tea gardens..</i>	221
<i>Figure 4.59: Seasonal variations of potassium of water inside the tea gardens...</i>	225
<i>Figure 4.60: Seasonal variations of potassium of water outside the tea gardens..</i>	226
